

OVERVIEW COMPONENTS

MDE 4/25 CABLES

- A1 USB/A “adapter” cable to PC connection [*male-to-female*]
- A2 USB/A “adapter” cable power supply connection [*male-to-female*]
- B1 PC connection cable
- B2 Power supply cable

CHECKS PROCEDURE

At each step, check the functionality of the trainer.
If the problem persists, proceed to the next step.

STEP I

Replace the power supply with an equivalent, one with at least 5 V (2A)

STEP II

Swap A2 cable with A1, then insert A1 adapter cable instead of A2

STEP III

Swap cables B2 and B1

WARNING

Be careful to **NOT** connect the PC to the mini-USB socket dedicated to the power supply (don't connect the power supply to the mini-USB socket dedicated to the PC).
